FOR IMMEDIATE RELEASE

New Product Release

iFlora® Nasal Health – A Daily Probiotic for Sinus and Nasal Health

Topics:

- New use for probiotics
- Natural sinus and nasal health solutions
- Probiotics help immune system work in distal (distant) sites including sinuses

Probiotics—not just for digestive health!

Sedona Labs (Cottonwood, AZ), a leader in multi-strain probiotic formulas for over 20 years, introduces its new line of specialized probiotic formulas with patent-pending iFlora® Nasal Health. Based on clinical research by Swiss scientists, iFlora® Nasal Health contains four specific strains of probiotics that maintain nasal and sinus health by supporting a healthy immune response. The product also contains N-acetyl cysteine (NAC), a natural antioxidant that breaks up stagnant mucus (mucolytic). It's a powerful combination of probiotic protection, potent antioxidant activity—plus mucus busting power that supports sinus and nasal health.
